

Support

A full year of updates and support is included with the purchase of your PowerQuote system. You also get printed and pdf manuals. Since PowerQuote is so reliable and easy to use, you probably won't need much technical assistance but there is peace of mind in knowing we're ready to help when needed. You'll also appreciate the regular updates that keep you in step with changes in computer and printing technology.

Cross Platform

Run a single workstation on Windows XP, Vista or Mac OS X; or network any combination of operating systems. Use with or without a dedicated server. OS X version is Universal Binary providing fast native speed on both PowerPC and Intel Macs.

Free Demo

Visit our web site and see our demo movies for your choice of offset, digital or large format estimating. Then schedule your free phone demo where we can walk you through an estimate over the phone. You'll receive the free demo software, learn the basics and get answers to all your questions.

What is PowerQuote?

PowerQuote is a modular and expandable estimating and management tool for offset and/or digital printers. Primary functions include:

User Friendly.

Designed by an experienced printshop owner/manager, the system is very user friendly and works the way an *estimator* thinks. It leads you through the estimate showing all the specs and charges. Printers with 1 to 20 employees enjoy many benefits from PowerQuote including :

Benefit	Feature
Win more jobs	Impressive written quote
Improved customer service	Fast estimating, job history
Protect profits	Accurate cost-based pricing
Stop production mistakes	Job SAVE™ system
Reduce paper expense	Accurate spoilage estimate
Fewer setups and washups	Production schedule
Better cash flow	Integrated invoicing

Prices accurately based on your shop's costs.

Easily adjust the built-in rates to match your operation. For each offset press you can set the basic setup time, washup time, IPH, plate material costs and more. Up to 12 different press rates for any type of offset sheetfed press plus all the associated pre-press and bindery. Combine multiple production runs into a single booklet quote.

PowerQuote's high speed digital printing estimating module lets you choose from 3 estimating methods for each of 6 printers: price grid (based on number of originals and copies each), cost per click, or budgeted hourly rate. Separate input windows keep simple jobs simple or allow digital booklet estimates with up to 6 different types of paper in any combination of black, color or blank.

Large format estimating handles rates for up to 12 speeds on each of 10 printers. Estimate for sheets, rolls, one sides or 2 sided on any media. Choose simplified price per sq. ft. or cost based pricing.

Sell more with PowerQuote's impressive written quote.

PowerQuote's customizable written quote contains complete information and makes a professional presentation that can be printed or emailed. It includes job specs, proof, delivery and turnaround time – important factors that some other systems ignore. PowerQuote let's you quickly deliver great looking quotes to earn more work. Download the sample reports from our web site.

Job SAVE™ system stops mistakes!

Only PowerQuote features a job ticket with clear instructions in sentence format. In addition it has Job Specification Accuracy Verification (SAVE™) that insures jobs are printed with the correct ink, paper, size etc. It is an exclusive system of checks to insure the job is printed correctly. A more conventional, stand-alone job ticket is also available.

PowerQuote is focused on increasing your profit.

Each feature and report is made with an eye toward making you money.

- Accurate paper makeready calculation saves you money on paper while eliminating shortages.
- Job ticket shows production times so employees have a goal which boosts productivity.
- Production schedule has just the right info to make it easy to save washups and setups.
- Fast retrieval of jobs for re-orders improves customer service and sales.
- Our productivity discount feature (offset and digital) allows you to consider the greater productivity associated with longer run jobs. You can win more of the big jobs while protecting profit.
- Price analysis report lets you compare estimated costs to actual over a period of time including offset press hours, plates, clicks for digital, dollar amount of jobs billed on each printer or press and more.
- Easily track and charge for added desktop publishing, file prep and customer changes.
